Introduction

This document is presented to the State Records Commission in accordance with Section 28 of the *State Records Act 2000* (the Act). Section 28 (5) of that Act requires that no more than 5 years must elapse between approval of a government organisation's Recordkeeping Plan and a review of it.

State Records Commission (SRC) Standard 1 – Government Recordkeeping requires that government organisations ensure that records are created, managed and maintained over time and disposed of in accordance with principles and standards issued by the State Records Commission. State Records Commission Standard 2 – Recordkeeping Plans comprises six Recordkeeping principles each of which contains minimum compliance requirements.

Purpose

The purpose of this Recordkeeping Plan (RKP) is to set out the minimum requirements as to which records are to be created by the Shire of Shark Bay and how it is to keep its records. The Recordkeeping Plan is to provide an accurate reflection of the recordkeeping program within the organisation, including information regarding the organisation's recordkeeping system(s), disposal arrangements, policies, practices and processes. The Recordkeeping Plan is the primary means of providing evidence of compliance with the Act and the implementation of best practice recordkeeping within the organisation.

Objectives

The objectives of the Shire of Shark Bay Recordkeeping Plan are to ensure:

- Compliance with Section 28 of the State Records Act 2000;
- Recordkeeping within the Shire of Shark Bay is moving towards compliance with State Records Commission Standards and Records Management Standard AS ISO 15489;
- Processes are in place to facilitate the complete and accurate record of business transactions and decisions;
- Recorded information can be retrieved quickly, accurately and cheaply when required; and the
- Protection and preservation of the Shire of Shark Bay's records.

Scope

In accordance with Section 17 of the Act, the Shire of Shark Bay and all its employees are required to comply with the contents of this Plan.

This Recordkeeping Plan applies to all of the Shire of Shark Bay's:

- Employees;
- Contractors;

- Organisations performing outsourced services on behalf of the Shire of Shark Bay; and
- Elected Members.

NOTE: The policy approach of the State Records Commission in monitoring the recordkeeping obligations in respect to Local Government elected members is:

"In relation to the recordkeeping requirements of Local Government elected members, records must be created and kept which properly and adequately record the performance of member functions arising from their participation in the decision making processes of Council and Committees of Council. This requirement should be met through the creation and retention of records of meetings of Council and Committees of Council of Local Government.

Activities or transactions which stem from the performance of other roles by Local Government elected members that are not directly relevant to the decision making processes of Council or Committees of Council are not subject to mandatory recordkeeping requirements. Accordingly, the creation and retention of records relating to these activities or transactions is at the discretion of the Local Government."

Local Governments are to address the management of elected member's government records in accordance with this policy, in their Recordkeeping Plans.

This Recordkeeping Plan applies to all records created or received by any of the above parties, regardless of:

- Physical format;
- Storage location; or
- Date created.

For the purposes of this Recordkeeping Plan, a record is defined as meaning "any record of information however recorded" and includes:

- (a) any thing on which there is writing or Braille;
- (b) a map, plan, diagram or graph;
- (c) a drawing, pictorial or graphic work, or photograph;
- (d) any thing on which there are figures marks, perforations, or symbols, having meaning for persons qualified to interpret them;
- (e) any thing from which images, sounds, or writings can be reproduced with or without the aid of anything else; and
- (f) Anything on which information has been stored or recorded, either mechanically, magnetically, or electronically." (State Records Act, 2000)

Principle One: Proper and Adequate Records

Principle: Government organisations ensure that records are created and kept which properly and adequately record the performance of the organisation's functions and which are consistent with any written law to which the organization is subject when performing its functions.

1.1 Historical Background

The Shire of Shark Bay which was established on 14 March 1904, is made up of two peninsulas on the western most point of Australia, 1,500km of coastline, together with some 25,000km² of Hinterland. The Bay itself covers an area of approximately 8,000km² with an average water depth of 10m. A quarter of this area has an average depth of less than 1m.

The town of Denham, the main settlement within the Shire, is some 840km from Perth, 405km from Geraldton, 330km from Carnarvon and 129km from the Overlander turn-off on the North West Coastal Highway.

Shark Bay is a thriving community with tourism, fishing, pastoral, pearl and salt production as the main industries. Outside Denham, settlements also exist at Monkey Mia, Nanga, Overlander and Billabong. Useless Loop is a "closed" mining town located 250km from Denham by road or 25km across the bay.

The Shire is made up of two wards – Denham and Useless Loop/Pastoral Ward.

1.2 Strategic Focus & Main Business Activity

Visior

Shark Bay is a proud united community, respecting and sharing our pristine environment and celebrating our great lifestyle.

1.3 Functions, including those outsourced

The Shire of Shark Bay is constituted under section 2.5 of the *Local Government Act 1995* and provides for the good governance of the district.

The Shire of Shark Bay provides for the good governance of the community in its district, including legislative and executive functions. The services of the Shire of Shark Bay are available to all customers, free from any form of discrimination. The functions and activities of the Shire of Shark Bay (including those contracted out to other organisations) are outlined in Appendix 1.

1.4 Major Stakeholders

The Shire of Shark Bay recognises employees, residents, ratepayers, the general public and Elected Members as its major stakeholders.

The Shire of Shark Bay recognises and supports activities of those groups that also provide services to residents, including community groups, the business community and State and Federal Government agencies.

Some of the major stakeholders that have been identified include:

- Gascoyne Development Commission
- Department of Fisheries
- Shark Bay Tourist Association
- Department of Biodiversity, Conservation and Attractions

1.5 Enabling Legislation

The Shire of Shark Bay is constituted as a district under Part 2 of the *Local Government Act 1995*. The general function of a Local Government under section 3.1 of the Act is to provide for the good government of persons in its districts. The general function of a Local Government under the Act includes legislative and executive responsibilities.

Using its legislative powers under section 3.5 of the Act, a Local Government may make local laws prescribing all matters that are required or permitted to be prescribed by local law, or are necessary or convenient to be so prescribed for it to perform any of its functions under the *Local Government Act 1995*.

The Local Government's executive powers under section 3.18 of the Act, involves administering its local laws and doing other things that are necessary or convenient to be done for, or in connection with, performing its functions under the *Local Government Act 1995*, including the provision of services and facilities.

1.6 Legislation and Regulations Administered by the Shire of Shark Bay

See Appendix 2.

1.7 Other Legislation Affecting the Shire of Shark Bay

See Appendix 3.

1.8 Major Government and/or Industry Standards

See Appendix 4.

2. Principle Two: Policies and Procedures

Principle: Government organisations ensure that recordkeeping programs are supported by policy and procedures.

2.1 Hard Copy Records

The creation and management of hard copy records is carried out by all of the Shire of Shark Bay's staff, but is overseen by the Executive Manager Finance and Administration, Executive Assistant and the Records Officer.

Table 2.1

Recordkeeping Activities for the management of hard copy records covered in the Shire of Shark Bay's Policies and Procedures	YES	NO
Correspondence capture and control – including incoming and outgoing mail registration; responsibilities assigned for classifying, indexing and registration; file titling and file numbering conventions.	>	
Mail distribution – including frequency, tracking mechanisms and security measures.	>	
File creation and closure – including assigned responsibility and procedures for file creation.	>	
Access to corporate records – procedures for access to and security of corporate records.	>	
Authorised disposal of temporary records and transfer of State archives to the State Records Office – responsibilities assigned and a regular disposal program is in place.	~	

2.2 Electronic Records

The creation and management of the Shire of Shark Bay's electronic records, including electronic mail, are to be carried out by all staff.

Table 2.2

Recordkeeping Activities for the management of electronic records covered in the Shire of Shark Bay's Policies and Procedures	YES	NO
Electronic records management – including the organization's approach and methodology for the capture and management of its electronic records (for example, whether records are created and kept electronically or are printed off and kept in hard copy format).	~	
Email management – including the capture, retention and authorized disposal of email messages to ensure accountability (i.e. kept electronically or printed off into hard copy).	~	
Website management — i) If web information also exists in hard copy guidelines are in place to determine which is the complete and accurate record, particularly in regard to the purpose of the site (e.g. whether informational/transactional).	~	
ii) Responsibility for the website and strategies implemented for the management of the website over time.		
Metadata management – including authority for the capture and control of metadata.		
System/s management – including any delegations of authority for the control and security of systems utilized by the organization.	~	
Migration strategy – strategies planned or in place for migrating electronic records for long-term retention and access.		>

Creation of Records

All Elected Members, staff, and contractors will create full and accurate records, in the appropriate format, of the Shire of Shark Bay's business decisions and transactions to meet all legislative, business, administrative, financial, evidential and historical requirements.

Capture and Control of Records

All records created and received in the course of Shire business are to be captured at the point of creation, regardless of format, with required metadata, into appropriate record keeping and business systems that are managed in accordance with sound record keeping principles.

Security and Protection of Records

All records are to be categorised as to their level of sensitivity and adequately secured and protected from violation, unauthorised access or destruction, and kept in accordance with necessary retrieval, preservation and storage requirements,

Access to Records

Access to the Shire of Shark Bay's records by staff and contractors will be in accordance with designated access and security classifications. Access to the Shire of Shark Bay's records by the general public will be in accordance with the Freedom of Information Act 1992 and the Shire Policy. Access to the Shire of Shark Bay's records by Elected Members will be via the Chief Executive Officer in accordance with the Local Government Act 1995.

Appraisal, Retention and Disposal of Records

All records kept by the Shire will be disposed of in accordance with the General Disposal Authority for Local Government Records, produced by the State Records Office of Western Australia.

2.3 Certification of Policies and Procedures

The Shire of Shark Bay's Recordkeeping Policy and Email Policy have been adopted by Council. These policies form part of the Shire of Shark Bay's Policy Manual.

2.4 Evaluation of Policies and Procedures

The evaluation of the Shire of Shark Bay's Policies and Procedures on Record Keeping is a continuing and an ongoing process. An evaluation of their efficiency and effectiveness is triggered through our Records Training program which leads to us modifying the policies and procedures accordingly.

3. Principle Three: Language Control

Principle: Government organisations ensure that appropriate controls are in place to identify and name government records.

3.1 List of Subject Headings

The Shire of Shark Bay has developed a List of subject headings to control the titling of records. The List of subject headings is attached.

See Appendix 6 for current filing system; and See Appendix 7 for old filing system.

3.2 Assessment of its effectiveness

The Shire of Shark Bay's current Filing index is performing effectively and efficiently and reflects the Shire's current business operations. It covers both administrative and functional activities of the Shire of Shark Bay, is available for use by all staff and information can be filed and found without difficulty. This tool will be adjusted to reflect changes to the functions and activities of the Shire of Shark Bay as may occur from time to time.

4. Principle Four: Preservation

Principle: Government organisations ensure that records are protected and preserved.

4.1 Assessment of the Risks

4.1.1 Onsite records storage

The Shire of Shark Bay has its current, active, inactive and archival records located onsite at 65 Knight Terrace Denham. The storage facility includes:

- Metal compactors
- Constant temperature (air conditioned)
- Cyclone proof Building

It appears that the risk associated in respect to the Shire's premises is low. Records are stored in a secure site at the Shire Office in the Compactors. Files are stored at a constant temperature, records are stored in a cyclone proof building and are not subject to security issues (low chance of files been stolen as the room is secured by lockable doors). Any documents classified as being sensitive are stored in the Shire's fireproof filing cabinets.

Personal records, tax records and property records are stored in a locked filing cabinet, of which is considered to be fire and vermin proof.

4.1.2 Offsite records storage, including offsite use of records

The Shire of Shark Bay has its non-current, inactive and archival records located in a sea container, which is located at the Shire depot.

The sea container unit situated at this site is locked via a heavy duty industrial padlock. Only authorised staff members that are in possession of a key can enter the sea container. The sea container is deemed to be cyclone proof. All records are stored in cardboard archive boxes on metal shelving. All access to the sites by staff is monitored and the key signed-out to that particular staff member.

The main disaster threatening records stored in the sea container records storage facility comes from fire, flood, industrial accident, vermin or pests.

With the sea container storage conditions being as described the risk is assessed as low to medium, as the likelihood of such incidences occurring are relatively low.

4.1.3 Storage of Backups of Electronic Records

Physical electronic backups of the Shire of Shark Bay's computer records are held on a NAS Drive in the air conditioned server room at Council's main office and a second backup is held offsite on a Cloud location iftp.pps.net.au and is backed up twice a day.

4.1.4 Quantity of records

The Shire of Shark Bay holds:

48 metres of temporary records stored onsite; 0 metres of temporary records stored offsite;

0 metres of State archives stored onsite; and 10 metres of State archives stored offsite.

4.2 Assessment of the Impacts of Disasters

The risk of a disaster occurring to the records of the Shire of Shark Bay has been assessed overall as being low to medium. The impact of a disaster on the organisation's records has therefore been assessed as medium. There are sufficient strategies in place to ensure that business activities of the organisation will not be unduly affected in the event of a disaster occurring.

4.3 Strategies in Place for Prevention and Response

The Shire of Shark Bay will be implementing a Disaster Plan to deal with the preservation of all physical and electronic records that it holds.

A disaster is defined as -

A sudden, unexpected, unwanted event, of any size, that critically obstructs the normal flow of business and that causes damage to, or loss of records and property.

The personnel, equipment, software systems, databases, records and information which comprise the Shire of Shark Bay are necessary in order for the Council to function in an effective manner. The purpose of the Disaster Plan is to detail procedures for promptly responding to situations immediately threatening the paper based and electronic records at the Shire of Shark Bay, and by identifying resources and strategies for recovery that will reduce the likelihood of a disaster, and the amount of damage that can occur.

It is acknowledged that a major threat to the preservation of records is the risk of disasters, natural or otherwise. A disaster recovery plan is essential to ensure the swift, efficient and effective resumption of the Shire of Shark Bay's records system and the wide range of activities it supports following a disaster.

The Disaster Plan will act as a comprehensive resource for the recovery process by outlining the four stages of disaster management for records, namely:

- Prevention
- 2. Preparedness
- 3. Response; and
- 4. Recovery

In the event of disaster affecting the Shire of Shark Bay's records, the swift and complete recovery of physical and electronic records would be essential in ensuring minimal impact on the Shire of Shark Bay's operations. Information is a key resource in all processes at the Shire of Shark Bay, and the loss of this resource would either significantly slow each process or halt each process entirely. The records system, as the primary repository for the Shire of Shark Bay's information, has the greatest potential to impact the widest range of the Shire of Shark Bay's operations if destroyed in a disaster.

The loss of the Shire of Shark Bay's records system could impact the Shire in a number of ways. The major areas of likely impact are as follows:

- Customer Service
- Staff Down time
- Uninformed Decision Making
- Loss of Corporate Memory

4.3.1 Vital Records Program

A vital records program will be developed by the Shire of Shark Bay. Vital records have been identified as:

- Licenses
- Deeds
- Agreements/Contracts
- Guarantees/Warrantees

Vital records in hard copy are currently stored in a locked, fire resistant safe, accessible to authorised staff. These records have been copied and the copies are placed on the relevant files and are used for all normal business activities.

4.3.2 Back-up Procedures for Electronic Records

Physical electronic backups of the Shire of Shark Bay's computer records are held on a NAS Drive in a locked and air conditioned server room at Council's main office. A second backup is held offsite on a Cloud location iftp.pps.net.au. These electronic records are backed up twice a day.

4.3.3 Security

The following security measures will be put into place at the Shire of Shark Bay to ensure the security of its records, both hard copy and electronic, and authorised access to them:

- Hard copy records are to be stored in a locked / secure room accessible only to records staff.
- There is a manual system in place to track records retrieved from storage areas. When a staff member retrieves a record, a File Movement Register is completed. Each staff member is required to enter their name; date of retrieval; file number; file name; and date that the file was returned. This procedure allows the Records Officer to determine who is in possession of the file, particularly in incidences where more than one employee requires use of a file
- Electronic records have varying degrees of access depending on delegations assigned to staff within the organisation.
- Electronic records are currently backed up on a regular basis as described previously.

4.3.4 Storage Reviews

The storage facilities utilised by the Shire of Shark Bay are reviewed regularly to ensure that conditions are appropriate for the organisation's records.

4.3.5 Recovery of Lost Information

The Shire of Shark Bay has developed a set of quick response strategies to recover lost information should a disaster occur which is part of the Disaster Plan.

5. Principle Five: Retention and Disposal

Principle: Government organisations ensure that records are retained and disposed of in accordance with an approved disposal authority.

5.1 General Disposal Authority for Local Government Records

The Shire of Shark Bay uses the General Disposal Authority for Local Government Records, produced by the State Records Office, for the retention and disposal of its records.

5.2 Other Disposal Authorities

Not Applicable

5.3 Restricted Access Archives

Not Applicable

5.4 Archives not Transferred to the State Records Office

Not Applicable

5.5 Disposal Program Implemented

The Shire of Shark Bay has implemented the General Disposal Authority for Local Government Records and conducts a regular disposal program on an annual basis.

5.6 Authorisation for Disposal of Records

Before any temporary records are destroyed or State archives are transferred to the State Records Office, a list of those records due for destruction or transfer will be reviewed by the Chief Executive Officer.

6. Principle Six: Compliance

Principle: Government organisations ensure their employees comply with the Recordkeeping Plan.

6.1 Staff Training, Information Sessions, Publications

Shire staff are trained in the use of the Shire's electronic recordkeeping system on a regular basis. All staff are now adhering to sound record keeping practices and are proficient in the use of the Shire's electronic recordkeeping system.

On the commencement of employment staff are inducted with the Shire's policy and procedures manual covering records management and are given extensive training in how to utilise the Shire's electronic recordkeeping system.

Table 6.1

Activities to ensure staff awareness and compliance		NO
Presentations on various aspects of the Local Government's recordkeeping program are conducted. These are delivered to all staff on a regular basis.	>	
In-house recordkeeping training sessions for staff are conducted.	>	
From time to time an external consultant is brought in to run a recordkeeping training session for staff. Staff are also encouraged to attend training courses outside the organisation whenever practicable.	<	
Staff information sessions are conducted on a regular basis for staff as required.	>	
The Local Government provides brochures or newsletters to publish recordkeeping information, highlight issues, or bring particular recordkeeping matters to staff attention.	>	
The Local Government's Induction Program for new employees includes an introduction to the Local Government's recordkeeping system and program, and information on their recordkeeping responsibilities.	>	

Coverage of the training/information sessions as detailed here extends to all staff. However, records management staff are offered more frequent and more specialised training when required.

6.2 Performance Indicators in Place

The following performance indicators have been developed to measure the efficiency and the effectiveness of the Shire of Shark Bay's recordkeeping systems:

- Satisfied customers (compliments vs complaints)
- · Proportion of departments using the records management service
- Whether staff use records management tools, follow procedures, etc.
- Audit queries that relate to recordkeeping
- Recordkeeping system/s meeting recordkeeping requirements
- Ability to meet external enquiries for records (Freedom of Information requests, subpoenas etc).

6.3 Agency's Evaluation

The Shire of Shark Bay's Recordkeeping System has not been regularly reviewed. As detailed below, the following measures are to be implemented to ensure that the Shire of Shark Bay is meeting the requirements of this plan and the business requirements of the organisation.

Comprehensive Record Keeping System Review

Annually, the Shire of Shark Bay's Recordkeeping System will be evaluated for efficiency and effectiveness. This comprehensive review of the system will report on the efficiency and effectiveness of the system at meeting the objectives of the Shire of Shark Bay's Policy on Recordkeeping. The review will be conducted by the Executive Manager Finance and Administration and a Senior Staff member in consultation with a representative sample of Shire staff. The review is proposed to address the following areas:

- The extent to which the system meets the Recordkeeping Policy objective;
- Level and extent of the system usage across the organisation;
- Processes that are working well;
- o Processes that are not working well or are not being utilised;
- Problems and challenges experience by staff;
- o Specific processes requiring improvement; and
- Staff ideas and suggestions for improvement;

Internal Recordkeeping Audits

Every six (6) months an internal recordkeeping audit will be conducted by the Executive Manager Finance and Administration. The audits will examine the extent to which staff members are following recordkeeping procedures and utilising the recordkeeping system. Any deficiencies that are discovered will be presented as audit action items to be addressed by the Executive Manager Finance and Administration within six (6) months. The satisfactory completion of the audit action items will be verified by the Executive Manager Finance and Administration. Actions that are not completed satisfactory will be referred back to the Executive Manager Finance and Administration or alternatively to the Chief Executive Officer.

7. State Records Commission Standard 6: Outsourced Functions

The purpose of this Standard, established under Section 61(1) (b) of the *State Records Act 2000*, is to define principles and standards governing contracts or arrangements entered into by a local government with persons to perform any aspect of recordkeeping for the organization.

Local governments may enter into contracts or other arrangements whereby an individual or an organisation is to perform a function or service for the local government, or act as the local government's agent to deliver services to clients, or for the local governments own use. The general term 'outsourcing' is used for such arrangements.

Contractual arrangements should provide that the contractor create and maintain records that meet the local government's legislative, business and accountability requirements.

7.1 Outsourced functions identified

Refer to Appendix 1 for those functions outsourced.

7.2 Recordkeeping Issues included in Contracts

7.2.1 Planning

The Shire of Shark Bay includes the creation and management of proper and adequate records of the performance of the outsourced functions detailed above, in the contract planning process for the outsourced functions.

7.2.2 Ownership

The Shire of Shark Bay has ensured that the ownership of Shire of Shark Bay records is addressed and resolved during outsourcing exercises. Where possible this will be included in the signed contract(s) / agreement(s).

7.2.3 Control

The Shire of Shark Bay has ensured that the contractor(s) / agent(s) creates and controls records in electronic or hard copy format, in accordance with recordkeeping standards, policies, procedures and guidelines stipulated by the Shire of Shark Bay.

7.2.4 Disposal

The disposal of all Shire of Shark Bay records which are the product of or are involved in any contract(s) / agreement(s) with the Shire of Shark Bay and contractor(s) / agent(s) will be disposed of in accordance with the General Disposal Authority for Local Government Records, produced by the State Records Office.

7.2.5 Access

Conditions for the provision of access to any Shire of Shark Bay records produced in the course of the contract(s) / agreement(s) have been agreed between the Shire of Shark Bay and the contractor(s) / agent(s).

7.2.6 Custody

The Shire of Shark Bay has recently adopted the procedure of ensuring all contracts state in relation to records - custody, ownership, disposal and transfer upon the completion of the contracts and will be specified in the contracts.

7.2.7 Contract Completion

The Shire of Shark Bay has adopted the procedure of ensuring all contracts to state in relation to records - custody, ownership, disposal and transfer upon the completion of the contracts and will be specified in the contracts.

		APF	PENDIX 1
	Functions of the Shire of Shark Bay		
Function	Brief Description of Local Government Function	Performed by the Local Government Tick If Yes	Performed by an External Agency Tick If Yes
Commercial Activities	The function of competing commercially or providing services to other local governments or agencies on a fee for service basis. Includes undertaking activities on a consultancy or contract basis.		~
Community Relations	The function of establishing rapport with the community and raising and advancing the Council's public image and its relationships with outside bodies, including the media and the public.	✓	
Community Services	The function of providing, operating or contracting services to assist local residents and the community.	✓	
Corporate Management	The function of applying broad systematic planning to define the corporate mission and determine methods of the Local Government's operation.	✓

10.26 Record Keeping

(1) Objective

The purpose of the Shire of Bay's Record Keeping Policy is to define the principles that underpin the Shire's records keeping function and the roles and responsibilities of those individuals who manage or perform record keeping processes on behalf of the Shire. This Policy establishes a framework for the reliable and systematic management of Shire records in accordance with Legislative requirements.

(2) Scope

The policy applies to all Government records created or received by a Shire of Shark Bay employee, contractor or Elected Member, or an organisation performing outsourced services on behalf of the Shire of Shark Bay, regardless of their physical format, storage location or date of creation.

(3) Policy Statement

The Shire of Shark Bay recognises its records as a Government-owned asset and will ensure that they are managed as such. Ownership and proprietary interest of records created or collected during the course of business (including those by outsourced bodies or contractors) is vested in the Shire of Shark Bay.

(4) Roles and Responsibilities

1 Elected Member

All elected members are to create, collect and retain records relating to their role as an Elected Member for the Shire of Shark Bay in a manner to commensurate with Legislation and the Shire's Policies and procedures for record keeping. Electoral and personal records of Elected members are exempt.

2 Chief Executive Officer

The Chief Executive Officer is to ensure that an organisational system for the capture and management of records is established that is compliant with Legislative requirements.

3 Managers

All Managers are to ensure the Record Keeping Policy and procedures are known and adhered to in their area of responsibility.

4 All Staff

All staff (including contractors) will create, collect, and retain records relating to the business activities they perform. They are to identify -

a) Significant and Ephemeral Records

b) Ensure significant records are captured into the Record Keeping System and that all records are handled in a manner to commensurate with Legislation and the Shire's Policies and procedures for record keeping.

(5) Creation of Records

All Elected Members, staff, and contractors will create full and accurate records, in the appropriate format, of the Shire's business decisions and transactions to meet all legislative, business, administrative, financial, evidential and historical requirements.

(6) Capture and Control of Records

All records created and received in the course of Shire business are to be captured at the point of creation, regardless of format, with required metadata, into appropriate record keeping and business systems, that are managed in accordance with sound record keeping principles.

(7) Security and Protection of Records

All records are to be categorised as to their level of sensitivity and adequately secured and protected from violation, unauthorised access or destruction, and kept in accordance with necessary retrieval, preservation and storage requirements,

(8) Access to Records

Access to the Shire's records by staff and contractors will be in accordance with designated access and security classifications. Access to the Shire's records by the general public will be in accordance with the *Freedom of Information Act 1992* and the Shire Policy. Access to the Shire's records by Elected Members will be via the Chief Executive Officer in accordance with the *Local Government Act 1995*.

(9) Appraisal, Retention and Disposal of Records

All records kept by the Shire will be disposed of in accordance with the General Disposal Authority for Local Government Records, produced by the State Records Office of Western Australia.

10.28 Email Policy

(1) Introduction

Email (external/internal) forms part of the official business communication of the Shire of Shark Bay, as such email is governed by the same legislative requirements (*State Records Act 2000*) as all records.

Email sent or received contains information about business activities and therefore can function as evidence of business transactions in a court of law; they are subject to legal processes such as discovery and subpoena. The records may also be required by Royal Commissions, auditors and other people/bodies to whom they may be subject.

Electronic messaging systems are communication devices like the telephone, facsimile or post, and as such cannot be isolated from the records management system.

(2) Email as Official Records

Email messages are official records of Shire business; legislation requires Council to be accountable for that business.

Transactions that provide evidence of business activities and are required for ongoing business should be documented in the records management system.

Email messages that document -

- * what happened
- * what was decided
- * what advice was given
- who was involved
- when it happened
- order of events and decisions

should be printed out, with appropriate contextual details and attachments, and filed on the Shire's paper based files until electronic recordkeeping practices are developed.

(3) Purpose of this Policy

The purpose of this Policy is to ensure the proper use of the Shire of Shark Bay's email system and applies to all Council employees, Councillors, contractors, consultants, temporary and casual staff, and other authorised personnel of the Shire of Shark Bay.

The Shire makes electronic mail available to its staff so they may efficiently share and exchange information in the pursuit of the Shire's goals and objectives.

The Shire of Shark Bay is a diversified organisation, where staff work varying hours and days, electronic mail allows Shire staff to help overcome the barriers of time and space in communication.

(4) Policy Statement

- 1 The Shire of Shark Bay's email system and the messages sent through it are part of the Shire's formal communication network. This means that Shire records now include information kept in electronic form.
- 2 Email messages must be kept if they provide evidence of the Shire of Shark Bay's business and activities, are needed for use by others or affect the work of others. Staff sending and receiving emails are responsible for deciding if an email message is considered to be a Shire record and making sure that these messages are documented or printed out and placed on the appropriate file to provide a formal record.
- 3 Email messages which become Shire records must be retained in accordance with the approved retention periods listed in the Local Government Disposal Schedule.
- 4 Access to email is limited to Shire staff, or other authorised persons, who have been given a user identification and password. Staff must not give their password to another staff member or member of public and must not access other staff member's email without appropriate authority. Unauthorised access to programs or information will result in disciplinary action.
- The email system is part of Shire of Shark Bay's computer network and all the information processes, transmitted or stored in the system are the property of the Shire.
- 6 Email is a business tool. Staff must make sure that all email messages are brief, concise and business related and are kept in the system only as long as required.
- 7 Email messages that are retained as Shire records are accessible to the public under Freedom of Information and Privacy legislation.
- 8 Email systems should not be assumed to be secure. Staff must be aware of the potential risks involved in sending confidential or sensitive information by email.

(5) Procedures for Use of Electronic Mail

- 1 Email should be treated with the same significance as the signed letter. Your password and the ability for you to send an email message has the same authority as signed correspondence.
- 2 Email must be accessed at least once a day by each employee with access to a networked personal computer. Any unwanted email should be deleted.
- 3 Staff can maintain their own email address book.
- 4 Personal or private information such as personal notes or invitations, staff appraisals or job applications should not be included in an email message because it could be read by, or misdirected to, unauthorised persons. Messages may also continue to exist long after the sender has deleted them. Deletion eliminates the message or file name from your computer directory but the information itself exists in the back-up system until it has been overwritten.
- If you send an email message with a Shire document as an attachment, you must note the details of the source of the document on the attachment. These details should include the addressee, the sender and the date and time of dispatch and receipt. Such details can be recorded as a file note on the corresponding physical file, however it is preferred that a hardcopy of the email and attachment is placed on the file with the required details.
- 6 Email messages that are retained as part of Shire records should be saved in Central Records format.

- Remember that email is admissible as evidence in court so good judgement must be used and thought must be invested into what is written.
- Make sure email etiquette is followed. Messages must be kept polite and do not write in upper-case as this is considered as 'shouting'. Only send information that is of value to the received and do not make messages High Priority unless they are truly urgent.

(6) Information Protection and Confidentiality

All email accounts are the property of the Shire of Shark Bay and are provided to employees to be used primarily for legitimate business purposes, unless employees have prior approval from the Chief Executive Officer.

Email accounts are installed on a needs basis and are not automatically installed for all staff. A memo from a Manager forwarded to the Executive Manager Finance and Administration or Senior Staff is required for email connection. Staff granted access are responsible for managing all relevant emails received.

All email accounts including the data and messages contained within or transmitted via them are the property of the Council and are primarily intended for business use only.

All employees are advised that they do not have any personal or propriety rights over such email accounts.

The Shire of Shark Bay cannot guarantee the privacy or confidentiality of any email messages sent internally or externally.

The Shire of Shark Bay reserves the right, at any time and without the consent of the user, to inspect, monitor, examine, copy, store, forward, delete and disclose the contents of email messages, especially in relation to subpoenas and legal disclosures.

The CEO and Executive Manager Finance and Administration is the only employee authorised to undertake such procedures under strict disclosure conditions.

Any email information deemed important should be printed and, if required, an electronic copy maintained away from the email system.

Councillors and Shire employees must safeguard Shire information and information belonging to others such as Shire customers and suppliers from unauthorised or accidental disclosure, modification, damage or destruction, consistent with Shire Policy.

Shire employees should notify the Executive Manager Finance and Administration or the Chief Executive Officer of any unusual systems behaviour immediately as this may indicate security or virus related problems.

Email records must remain accessible while they are required to meet business and accountability requirements.

Email records that will be incorporated into the Central Records management system must be protected from alteration or manipulation.

Access to email is limited to Shire employees who have been given authorisation to do so and who have been given a user identification and password.

Virus infection of email systems is becoming more prevalent, viruses are being sent over the Internet on a daily basis. The virus scanner installed on the network should not be totally relied on as no scanning software can give 100% guaranteed protection.

Unless file attachments (especially sent over the Internet) can be positively identified they should be totally deleted and **NOT** opened as they may contain viruses. Notify the

Executive Manager Finance and Administration or Chief Executive Officer, if you receive questionable attachments or are unsure of what to do.

Scanned signatures should not be used in any circumstances as they can be altered (cut and pasted) to give the appearance that a document was signed officially.

(7) Inappropriate Usage of Email

- a Using email accounts for non-business purposes ie 'junk' mail.
- b Sending or distributing 'chain' letters, 'hoax' mail or for other mischievous purposes.
- c Using email to solicit outside business ventures or actions in violation of Shire Policy.
- d Using email to distribute software which is inconsistent with any vendor's license agreement.
- e Using email to request, access, transmit or convey fraudulent, illegal, offensive, threatening, abusive or harassing materials which violates the Shire's Code of Conduct.
- f Using language that may be offensive to another user ie profanity and obscenities.
- g Use of email to harass, abuse, intimidate or interfere with the ability of others to conduct Council business.
- h Unauthorised accessing of data or attempt to breach any security measures on the systems, attempting to intercept any data transmissions without authorisation.
- i Sending email messages of a defamatory nature, email can be used as evidence in a court of law, the Shire can be held liable for published defamatory material.
- j Use of email to disclose or transmit any classified, staff in confidence, commercial in confidence, restricted or sensitive material.
- k The distribution of information via email (excluding business or personal messages ie birthday, baby birth or anniversary details) such as Trade Union or Community Group material must be authorised by the Chief Executive Officer first.

(8) Violations of this Policy

Shire employees who violate any copyright or license agreements are acting outside the scope of their employment terms and conditions and will be personally responsible for such infringements.

Shire employees may be subject to limitations on their use of email as determined by the Chief Executive Officer.

The Executive Manager Finance and Administration will undertake periodic monitoring, auditing and activities to ensure staff compliance with the acceptable usage of email in reference to this Policy.

Use of the email system indicates consent to such activities.

Shire employees who violate this policy will be subject to disciplinary action.

Violating this Policy may also contravene the law or relevant legislation and subject the employee/Council to criminal or civil actions.

This Policy is issued under the authority of the Chief Executive Officer and will be reviewed and amended as required in consultation with Managers and Staff of the Shire of Shark Bay.

Procedures-Daily Mail

INCOMING MAIL

- The Records Officer collects the mail from the Post Office daily;
- The Records Officer opens mail and stamps all mail with a date stamp;
- Once all the mail has been opened the Records Officer then puts a file number on the
 correspondence and who the responsible officer is. The Records Officer also distinguishes
 between mail needing to be processed through Central Records or mail that is of "junk"
 nature which does not need to be processed through records;
- Correspondence is then scanned into central records;
- Original's are placed in relevant file, scanned documents in central records with internal recipient being able to access record through the Central Records Management System;
- Responsible officer to action and record action in central records;
- A list of all outstanding correspondence requiring a response is distributed to the responsible officer at the end of the month by the Records Officer.

OUTGOING MAIL

- Each staff member is responsible for the filing or capturing of their outgoing mail.
- Once correspondence is written the following should occur:
 - 1. All correspondence is to be created in Central Records and show the central record number and the file number.
 - 2. The original letter (on letterhead) is then put in an envelope by the officer, entered to the mail register and then placed in the mail tray. All outgoing mail is posted by the Records Officer daily.

SHIRE OF SHARK BAY

RECORDS MANAGEMENT PROGRAM

RECORDS MANAGEMENT OBJECTIVE

To ensure that the management of the Shire of Shark Bay's information resources and records management program provide timely and comprehensive information to meet operational business needs, accountability requirements and community expectations.

To ensure the preservation of the Shire's 'corporate memory' through sound recordkeeping practices and the accurate capture of information to meet legal, evidential and accountability requirements.

FILE CREATION AND MAINTENANCE PROCEDURES

Purpose:

To outline procedures for the creation, distribution and maintenance of files.

Practices and Procedures:

Each employee has the responsibility to ensure that records created, sent or received are placed on the relevant corporate file, or that a file is created where none exists within 24 hours of a project or activity commencing.

New files should be created when:

- A new project of activity commences; or
- Mail has been actioned; or
- Received and no file currently exists relating to the subject matter of the correspondence.

These files can be created with the assistance of a request form for the establishment of a file.

- 1. To have a new file created or a new part to a file created complete the file request form located with the Records Officer.
- 2. It will be envisaged that requests will be attended to the same day or within 24 hours.

Files may contain material of a highly confidential nature, e.g. personal files, or files containing commercially sensitive material. For this reason, access restrictions are to be placed on files to ensure privacy and confidentiality.

This should be noted when completing the file request form for the creation of new files.

Distributing Files

To ensure that records are readily accessible within the organisation it is important that the circulation of records is controlled and monitored. This is done by using a records tracking system. At the present, as no electronic tracking system is being utilised, file movement

sheets should be kept up-to-date and the Records Officer informed when passed to another employee. To enable efficient tracking of all users, details must be recorded in a clear and distinct manner.

It is to be noted that the last signatory or user of a file remains the responsibility for that file

Records are an asset of the Shire of Shark Bay and remain the property of the Shire. They should not be taken with employees when they leave, or removed from the site for longer than necessary. It is important that records continue to be available to other employees who need them.

Possession of a corporate file means accountability for it. If a file appears to be missing, the Records Officer should be informed immediately, and they will initiate the appropriate action to locate it.

Maintaining Files

Records are subject to many risks. They include light, atmospheric conditions including extreme temperatures and humidity, biological factors including mould, insect pests, vermin and mechanical damage. However, one of the most neglected reasons for damage to files is repeated usage and handling.

Proper protection of all records is essential in reducing the risks associated with poor record keeping practices.

Regular maintenance of files or records will be performed by the Records Officer to ensure that damaged files and fasteners etc are replaced.

The following preventative measures are to be observed when storing files:

- Steel paper clips, pins and staples are to be removed from files as they cause corrosive damage to files and pose a safety issue:
- New parts to files are to be created when files reach 2cm in thickness;
- Sticky notes containing important information relevant to the file are to be removed and recorded on A4 standard paper as file notes;
- Photocopies are to be made of thermal fax paper and newspaper cuttings if included as part of a file;
- Copies of photographs are to be made (either scanned or photocopied) and attached to the file while originals are stored with like material in appropriate conditions; and
- Documents are to be removed from plastic sleeves before being placed in a file.
 This prevents documents from falling out of the file.
- Records ideally should be stored in a dust-free environment with appropriate climate controls to ensure their long-tem survival.

RECORDS DISPOSAL PROCEDURES

Disposal

'A range of processes associated with implementing appraisal decisions

These include the -

- Retention
- Deletion
- Or destruction of records in or from recordkeeping systems.

They may also include the migration or transmission of records between recordkeeping systems, and the transfer of custody or ownership of records.'
(Definition from AS4390 Section 4.9)

Records Disposal Policy Statement

The disposal of Shire records is governed by the State Records Act, 2000.

Shire staff are required to use the General Disposal Authority for Local Government Records for the retention or disposal of administrative and functional records within Council.

The Executive Manager Finance & Administration is responsible for the Shire's record's disposal program and is to ensure records are protected and retained in accordance with the requirements detailed in the General Disposal Authority.

Shire staff have a number of basic obligations relating to the disposal of records:

- They should contact the Chief Executive Officer or Executive Manager Finance and Administration before initiating the disposal of Shire records.
- Staff members shall not alienate, relinquish control over, or destroy Shire records without specific authorisation from the Chief Executive Office or Executive Manager Finance and Administration.
- Staff members are required to handle records with care and respect in a sensible manner, to avoid damaging records, with a view to prolonging their lifespan.
- Staff are to advise the Chief Executive Officer or Executive Manager Finance and Administration prior to any transfer of records offsite to State Archives for the listing of inventories and appropriate sentencing of each record.

Practices and Procedures

All records created, received or held by the Shire of Shark Bay are disposed of legally, in accordance with Retention and Disposal Schedules approved by the State Records Commission. Retention and Disposal Schedules are a systematic and comprehensive listing of categories or series of records created and/or kept by local government, which plans the life of those records from creation to disposal, or permanent archive.

Retention & Disposal Schedules aim to:

- Select, preserve and make available all records that have a continuing value (Legal, Legislative, Financial, Administrative & Historical) to the Shire of Shark Bay;
- Destroy all records whose value has ceased; and
- Transfer to the State Archives all records that have a significant historical value to the people of Western Australia.

There are severe penalties for the unauthorised destruction of public records:

Section 78 of the State Records Act 2000 provides that:

- "(3) A government organisation employee who destroys a government record commits an offence unless the destruction is authorised by the record keeping plan of the organization."
 - Penalty: \$10,000

Section 110 of the Freedom of Information Act 1992 provides that:

- "A person who conceals, destroys or disposes of a document or part of a document or is knowingly involved in such an act for the purpose (sole or otherwise) of preventing an agency being able to give access to that document or part of it, whether or not an application for access has been made, commits an offence."
 - Penalty: \$5,000 or 6 months Imprisonment

Before any records can be destroyed or disposed of, it must have been reviewed and been allocated a retention and disposal code according to that prescribed in the General Retention and Disposal Schedule for Local Government as declared by the Public Records Office of Western Australia and the State Archives of Western Australia.

Approval to destroy any Council information require the approval and signature of the Chief Executive Officer and the Executive Manager Finance and Administration. Material which may be of importance to the Shire can be set aside or a representative sample kept for safe-keeping.

Destruction of Ephemeral Records

Ephemeral records have no continuing value to the Shire of Shark Bay and are generally only needed for a few hours or a few days. They may not need to be placed within the Shire of Shark Bay official Record Keeping System. Section 1.11 of the General Disposal Authority for Local Government Records 1999 describes ephemeral records, an extract of which is below. In accordance with this schedule, Shire of Shark Bay employees, contractors or Elected Members may dispose of such ephemeral records once reference ceases.

Description of Ephemeral Records (General Disposal Authority Ref.)

1.11.1

Duplicate (or exact) copies of records, documents, circulars, forms, etc.

1.11.2

Information material including price lists, catalogues, advertising material, brochures etc, produced by other organisations.

1.11.3

Reference sets of directories, addresses and contact lists, including internal directories and lists produced by the local government, other agencies and organisations or suppliers.

1.11.4

Unsolicited letters or promotional material which offer goods or services to the local government.

1.11.5

Messages in the form of voice mail, e-mail, telephone messages, post-it or sticky notes when the message does not relate to the business functions of the local government.

Note: Messages which do relate to the business functions of the local government must be transcribed and placed on the appropriate subject file. Once transcribed the original message may be destroyed.

1.11.6

Rough drafts of reports, or correspondence, routine or rough calculations not circulated to other staff in the local government, and of which a final draft has been produced and placed on the appropriate subject file.

Note: Versions of drafts which contain significant changes to context must be placed in the appropriate subject file e.g. internal policy.

1.11.7

Transitory messages giving minor instructions and of a routine or instruction nature that are used to further some activity in either a paper-based or electronic format eg. correcting typing errors; requesting file creation or retrieval; filing a letter; formatting documents; duplicating.

1.11.8

Letters or cards of appreciation, sympathy or greetings of no enduring value.

1.11.9

Working papers, background notes and reference materials used to prepare or complete other documents. Those documents become the record of the local government and are placed on the appropriate subject file.

Note: Working papers and background notes relating to the development of internal policy must be placed on the appropriate subject file. (State Records Office of WA, 1999)

Destruction of Other Records

The Shire of Shark Bay's Archives Procedure for the retention and disposal of records in its custody is based on the General Disposal Authority for Local Government Records.

Records that are not ephemeral and are held by the Shire of Shark Bay must only be destroyed by the Chief Executive Officer. This process must be in accordance with the General Disposal Authority for Local Government Records, produced by the State Records Office of Western Australia.

When a captured record is sentenced for archiving, it is assessed against the General Disposal Authority for Local Government Records. The metadata is recorded manually. The records are then stored in an appropriate archive box and removed to the off-site storage facility. The off-site storage facility is secure and has appropriate risk management measures in place to ensure document integrity.

While a retention period is established when records are captured into the Record Keeping System, changes in environmental circumstances may require the record to be retained for a further period. Such changes that could affect retention requirements include:

- The accuracy of the title of the file;
- Any significant historical events that have taken place since the record was sentenced;
- Current issues affecting the records;
- Whether any records are the subject of a current Freedom of Information application;
- Whether any of the records are subject to a current, pending or suspected court case or Subpoena; and
- Amendments to the Retention & Disposal Schedule since the records were archived.

Destruction of archived records follows the General Disposal Authority for Local Government Records. The procedure requires a reassessment of the documents to be destroyed. The documents are then recorded on an Archive Disposal Form. Each Departmental Head to which the documents relate must sign and allow the destruction. The Chief Executive Officer must then sign and finally authorise the destruction. The destruction is then arranged by the Executive Manager Finance and Administration. The destruction is to be witnessed, and a certificate of destruction obtained. The Record Disposal Certificate is retained permanently in the Shire of Shark Bay's Record Keeping System as evidence of the destruction having taken place. Finally, the Document Management System is updated to reflect the destruction. The procedure is conducted annually to ensure the efficient management of the Shire of Shark Bay's archives.

Transfer of Archival Records to State Archives

Shire of Shark Bay' records identified as having archival value in the General Disposal Authority for Local Government Records are to be retained in the State Archives. Archival value records may be those created as evidence of an administration where their value goes well beyond their day to day use. These records may also document the history of an area and its population and the cultural and economic conditions under which they lived. These records have been identified as having a lasting value for the state and are a valuable resource for students or researchers in such areas as history, genealogy, social geography, economics, demography and urban planning. In accordance with the General Disposal Authority for Local Government Records, all archival records will be transferred to State Archives five years after the date of last action.

RECORD KEEPING POLICY

Objective

The purpose of the Shire's Record Keeping Policy is to define the principles that underpin the Shire's records keeping function and the roles and responsibilities of those individuals who manage or perform record keeping processes on behalf of the Shire. This policy establishes a framework for the reliable and systematic management of Shire records in accordance with legislative requirements.

Scope

The policy applies to all government records created or received by a Shire of Shark Bay Employee, contractor or Elected Member, or an organisation performing outsourced services on behalf of the Shire of Shark Bay, regardless of their physical format, storage location or date of creation.

Policy Statement

The Shire of Shark Bay recognises its records as a government-owned asset and will ensure that they are managed as such. Ownership and proprietary interest of records created or collected during the course of business (including those by outsourced bodies or contractors) is vested in the Shire of Shark Bay.

Roles & Responsibilities

- Elected Members: All elected members are to create, collect and retain records relating to their role as an Elected Member for the Shire of Shark Bay in a manner to commensurate with legislation and the Shire's policies and procedures for record keeping. Electoral and personal records of Elected members are exempt.
- Chief Executive Officer: The Chief Executive Officer is to ensure that an organisational system for the capture and management of records is established that is compliant with legislative requirements.
- *Managers:* All Managers are to ensure record keeping policy and procedures are known and adhered to in their area of responsibility.

- All Staff: All staff (including contractors) are to create, collect, and retain records relating to the business activities they perform. They are to identify
- significant and ephemeral records, ensure significant records are captured into the Record Keeping System and that all records are handled in a manner to commensurate with legislation and the Shire's policies and procedures for record keeping.

Creation of Records

All Elected Members, staff, and contractors will create full and accurate records, in the appropriate format, of the Shire's business decisions and transactions to meet all legislative, business, administrative, financial, evidential and historical requirements.

Capture and Control of Records

All records created and received in the course of Shire business are to be captured at the point of creation, regardless of format, with required metadata, into appropriate record keeping and business systems, that are managed in accordance with sound record keeping principles.

Security and Protection of Records

All records are to be categorised as to their level of sensitivity and adequately secured and protected from violation, unauthorised access or destruction, and kept in accordance with necessary retrieval, preservation and storage requirements,

Access to Records

Access to the Shire's records by staff and contractors will be in accordance with designated access and security classifications. Access to the Shire's records by the general public will be in accordance with the Freedom of Information Act 1992 and the Shire Policy. Access to the Shire's records by Elected Members will be via the Chief Executive Officer in accordance with the Local Government Act 1995.

Appraisal, Retention and Disposal of Records

All records kept by the Shire will be disposed of in accordance with the General Disposal Authority for Local Government Records, produced by the State Records Office of WA.

INTRODUCTION

There are a number of problems that can interrupt everyday business operations, from large scale natural disasters to local blackouts, any of which can put an IT system out of action not only for hours, but possibly days. The purpose of this report is to minimise the disruption to business operations by providing a plan and procedures for disaster situations. This report covers the three essential stages of a Business Continuity/ Disaster Recovery Plan (BC/DR Plan), namely what should be done **before a disaster, during a disaster and after a disaster.**

In anticipation of a disaster, it is essential to identify all of the risks that are faced by the Shire. This includes natural disasters such as floods, cyclones and fires, human threats such as vandalism, and technological hazards including computer viruses, these risks must be treated accordingly to reduce, and optimally eliminate, the potential impact of the underlying threat.

It is accepted that not all disasters are preventable, and some may be completely unexpected. Given this, a set of emergency procedures has been established to serve as a guideline in the event of a disaster.

After a disaster has occurred, the Shire must focus its resources on the process of recovery. This involves restoring all critical business functions, informing significant parties of the situation, such as the Shire's Insurance agency, and providing the necessary support to staff and the community. For the purpose of managing these activities, a Crisis Management Team has been developed.

The overall impact of a disaster on Shire activities may be devastating. However with the implementation of a BC/DR Plan the Shire may adequately prepare itself for the event of a disaster, and in turn significantly reduce the potential impact of a devastating situation.

BEFORE THE DISASTER

DISTRIBUTION OF THE BC/DR PLAN

Each member of the Crisis Management Team must keep two copies of the plan, one for the office and one kept at home. A number of copies should also be held at the Works Depot, Shark Bay Recreation Centre and Shark Bay Discovery and Visitor Centre. This will ensure that the BC/DR Plan is always available for reference.

RISK ASSESSMENT

Natural Hazards

- Flood
- Storms
- Fire

Natural hazards, such as those mentioned above, are common occurrences and depending on the area, some more likely than others.

Being situated near the ocean, in a low lying coastal area, the risk of flooding is high in the event of a storm and/or tidal surge. This type of flooding has been mitigated against because the server room and Records department are at least a metre above ground level. However further waterproofing of vital records should be considered.

Storms and cyclones are another natural hazard the Shire is highly exposed to, as they frequent the area particularly from November to May. Blackouts occur rarely however power surges are capable of affecting the Shire's IT system, causing computers to shut down, restart and may even result in physical damage to IT equipment. All critical servers are backed by an uninterruptible power supply (UPS) which reduces the potential impact of such a disaster. These are checked on a regular basis to ensure they are performing satisfactorily.

The risk of fire is much lower. Whilst the Shire is in a semi-arid coastal zone the risk of bush fires within the town boundaries is minimal. The risk of internal fire is moderate, as would equate to most enterprises. However the lack of fire alarm, sprinkler systems and other retardants within the Shire building does mean that a fire could have a major consequence to business continuity. Further fireproofing of the server room and Shire building should be a considered.

Insect and rodent infestation is another potential natural hazard. This hazard is managed with regular pest control at both the Shire building and Depot where the Works and Services department operates and archived records are kept.

Accidents

Vehicles

There is a very low risk from vehicle damage.

Human Threats

- Vandalism / Malicious damage
- Theft
- Human error

Theft and vandalism to IT equipment and hard copy records could have a devastating effect on Shire operations. Secure access to offices and server room, metal compactor storage for hard copy records (which are monitored by the records officer) and password protection for electronic files (with varying degrees of access depending of delegations assigned to staff) serve to mitigate against damage and reduce the potential for error.

Industrial Hazards

Power failure

As power is supplied to Denham by wind and diesel generators, outages do sometimes occur and naturally affect shire operations. However these power outages are quite rare occurring approximately 2 to 3 times per year, lasting between 0-3 hours. UPS equipment is currently in place to help prevent the physical server from shutting down instantly in the event of a such an occurrence.

Technological Hazards

- Computer virus
- Hardware failure
- Telecommunications failure

The risk of a computer virus infecting the Shires' network and computer system is always present. Given that new and more harmful viruses are created daily, these can cause significant disruptions if not managed. This risk can be greatly reduced by the use and maintenance of virus protection programs including 'Webroot Secure Anywhere Security as a Service.' This program is updated automatically on a daily basis and provides file and e-mail protection. The Shire also has its Internet Service Provider (ISP) complete a virus check on all incoming mail as well as using program 'IronPort' to filter all incoming spam.

In the event of an air conditioning failure, the temperature in the server room may rise rapidly causing the servers to overheat. Regular checks and services on IT hardware, either by Shire staff and/or the hardware suppliers themselves, will also decrease the chances of a malfunction.

Communications failures may result from a line failure inside the building, or from an external fault. The downtime experienced from line failures may last for approximately 3 to 4 hours. During this time, mobile phones may be used in place of the telephone network.

RISK MANAGEMENT

It is important to ensure that all risk factors are valid and up-to-date, according to Shire operations and building structures. To guarantee this, an assessment of all risk factors and possible new risk factors should be conducted every 12 months or after any structural changes are made to the Shire administration building and its contents.

Backup

Backups of all servers are currently performed automatically using the program 'ShadowProtect' to an external NAS drive, currently located at the Shark Bay main office server room. In addition all electronic information is backed up to a cloud twice daily. These backups occur incrementally during the day (1pm and 8pm) with a full backup over

the weekend. It is vital this procedure is carried out continually as it reduces the amount of data lost in the event of a disaster. Accordingly, employees should be made aware that any data stored onto the local C drive (C:/, My Documents, My Pictures and on the desktop) of workstations will not be stored by the current backup procedures. Work should only be saved onto the Server.

Staff Training

It is important for all staff members to be briefed on the plan and procedures for business continuity / disaster recovery, particularly on the areas that directly affect their department and work. In addition, new staff members should be given a copy of the BC/DR plan upon commencement of employment. Crisis Management Team members should be prepared to perform their assigned responsibilities in the event of a disaster, and all staff must be readily made aware of any significant changes to the BC/DR plan.

RISK RATINGS

The following table details the probability of the occurrence of each risk and the estimated impact of the risk on business operations. The probability of each risk is based on the two most influencing factors, being the frequency of past occurrences and precautionary measures currently taken to eliminate the risk from occurring.

Risk	Probability	Impact
Fire	Low	High
Flood	Medium	High
Storm	Medium	High
Vehicle Accident	Low	Low
Theft	Medium/ Low	Medium
Vandalism/Malicious damage	Medium/ Low	Medium
Power failure	Medium/Low	Medium
Human error	Medium	Low/Medium
Computer virus	Medium/Low	High
Communication failure	Medium/Low	Low

IMPACT RATINGS

Low – The impact will affect a small number of business operations, have a maximum downtime of 10 hours and have no effect on the Shire administration building.

Medium – The impact will affect most business operations, have a maximum downtime of up to 48 hours and have no effect on the Shire administration building.

High – The impact will affect most, if not all business operations, have a maximum downtime of up to 5 days and will require the relocation of staff to a crisis centre, due to structural damage to the Shire administration building.

DAILY PREPARATION

This section details simple measures all staff should practice on a daily basis to ensure business continuity.

Mobile Phone

Be contactable – always take it with you.

Laptop Computer /Tablet

Whenever possible, take it home with you at night.

BC/DR Plan

Keep a copy of this report at home and in your office. Ensure that it is kept up to date.

Evacuation

> Be familiar with evacuation procedures and fire exits.

Knowledge of Plans

Ensure you have a general understanding of the BC/DR Plan - remember, you are responsible for implementing a plan in a disaster.

Personal Awareness

➤ Be familiar with your specific responsibilities in a disaster – particularly if you are a member of the Crisis Management Team.

Testing of Plans

Participate in BC/DR training to expand your knowledge of your role in a disaster.

BUSINESS IMPACT ANALYSIS

A business impact analysis (BIA) shows that the following impacts may occur.

Low Impact Disasters

- Human error
- Telecommunication failure

Low impact disasters include those that will affect a small number of business operations, have a maximum downtime of 10 hours, and have no effect on the Shire administration building. At worst, the impact of such a disaster could affect a small aspect of all business functions, for example the loss of telephone services throughout the administration building. When such a disaster occurs, priority will be set at restoring the affected area, implementing any manual procedures that may replace the electronic processes and recovering any lost data.

Medium Impact Disasters

- Human Error
- Power Failure
- Vandalism / Malicious damage
- Theft
- Computer Virus
- Vehicle Accident

Medium impact disasters affect most business operations, have a maximum downtime of 48-72 hours and have little to no effect on the Shire administration building. At worst, these disasters can hamper most business functions and cause significant disruptions to daily operations and tasks. The BIA shows that all of the above disasters are capable of causing power outages, structural damage or equipment loss/damage. More specifically, if any of these disasters were to fall upon the server room, a complete network failure is estimated to be the most likely outcome, impacting the operations of all departments (with the exception of the Works and Services department.) In this instance the recovery of data would involve the replacement of all damaged/lost equipment (network servers, printers, PCs and so forth), as well as the restoration of data from backup drives. Priority would have to be placed on network servers in order to restore

the IT network as soon as possible.

High Impact Disasters

- Fire
- Flood
- Storm

High impact disasters will affect most, if not all business operations, have a maximum downtime of up to 5 days, and will require the relocation of staff to a crisis centre. In the event of a high impact disaster the Shire with the assistance of Professional PC Support will set up a small computer network, which is sufficient to have a small group (or department) operating within 5 days. An extensive network with the capability to support all Shire processes may take 14-21 working days to restore. The distinguishing factor between a medium impact disaster and a high impact disaster is its effect on the Shire administration building. A fire has the ability to completely destroy the building and all of its contents, including vital records, equipment and worst possible case, even cause death. Floods and severe storms also have the ability to significantly damage or destroy the building, vital records and equipment. In the event of a high impact disaster, the BC/DR plan will be actioned to its full extent, with priority being placed on the relocation of staff and resources to the crisis centre and the restoration of all critical business functions.

CRITICAL RECORDS

Critical records have been identified as: Rate books, Minute/Agenda books, Legal agreements, Contracts, Mortgages, Title deeds, Cemetery records, Employee files, Electronic backup Hard drives, Building plans and Planning approvals.

Hard copy critical records are stored in a metal compactor, accessible to the Records Officer, Executive Manager Finance and Administration and other authorised employees. Where practical, these records have been copied, the copies then placed on the relevant files and are used for all normal business activities.

Shire Administration Building

In the event of a disaster for business continuity, the Shire administration office may temporarily utilise manual purchase and receipt books until the IT network is restored.

For this reason, management must ensure that copies of the purchase and receipting books as well as cheques are stored offsite. Records of past financial statements were also determined as critical records, requiring copies of these documents to also be stored at an offsite location.

The Shire administration office has the responsibility for minutes, and personnel records. Many of these documents require permanent storage on behalf of the Shire and for this reason should be stored in a locked room onsite.

The Shire administration office also has the responsibility of; Storing and archiving legal documents, Correspondence, Regulative Services files, such as development applications (DAs), subdivision plans, building certificate register and historical documents (most of which are irreplaceable) and so forth. Many of these documents require permanent storage on behalf of Shire, and for this reason are stored in Metal compactors with duplicates stored off site (scanned documents to Central Records).

Works and Services

The majority of the records used and processed by the department of Works and Services will be stored electronically. However, some hard copy plans and records may exist and as such, these plans must be secured via safe or offsite storage.

CRITICAL BUSINESS FUNCTIONS

Finance and Administration

The Finance and Administration department must focus on restoring the following areas of business operation as soon as possible:

- Statement Preparation
- Rating
- Debtors/Creditors
- Payroll
- Customer Service
- Police Licensing

Administration

On a day-to-day basis the Administration department handles reports, minutes, among numerous other areas of responsibility. Overall, the department is responsible for the following areas of business operation:

- Legal Matters
- Council Meetings
- Annual Report
- Public Relations
- Public Disclosure

Regulatory Services (Building/Planning/Health)

On a day-to-day basis the Regulatory Services department handles: Reports, Correspondence, Minutes, Business papers and the Sending/receiving of mail, among numerous other areas of responsibility. Overall, the Regulatory Services department is responsible for the following areas of business operation:

- Property Management
- Records Management
- Legal Matters
- Land Management Plans
- Customer Service
- Animal Control
- Council Building Maintenance
- Building & Development Control
- Town Planning
- Public/Environmental Health
- Public Halls
- Caravan Parks
- Cemeteries
- Food Shop Inspection
- Public Conveniences
- Cemeteries
- Any other

Works and Services

In the event of disaster the Works and Services department (which operates out of the Shire Depot) would remain largely unaffected. The department operates fairly independently of the other departments so scheduled work can continue as normal. In the event of a disaster occurring at the depot building itself, one of the other buildings within the depot complex can be used as a backup whilst the main building is being restored to proper function.

DURING THE DISASTER

EMERGENCY PROCEDURES

The following section details the emergency procedures to be followed in the event of any disaster.

Assess the situation

There are two types of emergency situations; First is an emergency that requires the assistance of external emergency services, such as the police or fire department. The second type of emergency includes in-house disasters, where only the ability of an employee (or employees) to perform is affected, such as a power outage or server failure.

Building Evacuation (if necessary)

In the case of a life threatening (or equally dangerous) emergency, such as a fire or flood, the safety of all employees must be secured. The evacuation and safety plans must be actioned as soon as possible.

Contact Emergency Services (if necessary)

In the case of an emergency requiring the assistance of Police, Ambulance or the Fire department, *dial the number '000'*. It is important to speak clearly and remain composed, in order to effectively communicate the situation and follow any instructions given.

Contact the CEO

The CEO must be contacted (refer to the contact list on page 23) and informed of the disaster situation. If instructions are given, ensure that they are followed correctly. It is also the duty of the CEO to contact any additional staff or external parties that need to be notified.

Disaster Declaration

It is the responsibility of the CEO to determine whether or not the situation is a disaster. If a disaster is declared, the CEO must contact all Crisis Management Team members, notify them of the situation at hand and order immediate actioning of BC/DR plan.

The following flowchart illustrates the step-by-step emergency procedures.

FIGURE 1: EMERGENCY PROCEDURES

AFTER THE DISASTER

ACTIVATE THE CRISIS MANAGEMENT TEAM

Once a disaster is declared, the Crisis Management Team must meet at a specified meeting place. This meeting place should be at the multi-purpose meeting room at the Shark Bay Recreation Centre. The initial Crisis Management Team meeting should address the following matters:

Relocation

If significant structural damage is inflicted on the Shire administration building, relocation to one or more of the crisis Centre's will be required. These sites must be fitted with desks, chairs, stationery, faxes, photocopiers, computer and telephone systems within 48 hours so as to reduce the downtime experienced. In the event of a flood, the Shire may have to consider the option of relocating to higher ground, such as the Shark Bay Recreation Centre. The proposed crisis Centre's and a summary of relocation details are detailed in Appendix A.

Restore the IT Network

The Shire has an established relationship with Professional Pc Support in Perth and utilises their services for the supply of computer servers, workstations, application software, networking and maintenance of the network and backup storage. In the event that computer systems are destroyed, Professional PC Support is able to supply (on loan) the Shire with a small local area network (LAN) within 48 hours, consisting of a small number of PC's and server. If the entire network needs replacement, Professional PC Support may arrange a complete network to be delivered within 14-21 working days. The contact for Professional PC Support is given on page 24.

Restore Critical Business Functions

The Executive Manager Finance and Administration must restore all business functions as soon as possible. However, with an inoperable IT network, the use of manual processes may be required, until the IT network is restored.

External Contacts

The necessary external parties must be contacted and informed of the disaster, including insurance contacts, regulatory bodies and so on. Members of the community must be informed of any changes in the Shires' operations. If relocation is necessary, alternative contact numbers for the Shire and Shire staff, should be publicly announced.

Team Meetings

Team meetings should be scheduled at least once every two days. In determining the success of the recovery process it is critical that all team members remain fully informed of the situation, progress and new developments at all times. This will also provide the opportunity to present progress reports and address any outstanding issues.

Staff Briefing

It is important to maintain a high level of staff morale. Management may achieve this by keeping staff informed on a timely basis and involved in the recovery process. It is the duty of department managers to brief their staff on the situation following each Crisis Management Team meeting.

Damage Assessment

Any damage assessment must be organised by the CEO or the Executive Manager of Finance & Administration and is usually conducted by the insurance agent.

The following flowchart illustrates the basic activities that must be addressed by the Crisis Management Team following a disaster declaration

FIGURE 2: CRISIS MANAGEMENT TEAM ACTIVITIES

RELOCATION OF STAFF AND BUSINESS PROCESSES

Three crisis Centre's have been identified to accommodate all Shire staff, namely the Shark Bay Recreation Centre, the Town Hall and the Shark Bay World Heritage Discovery and Visitors Centre.

The nature of the disaster will dictate which venue is chosen, but preference is given to the Shark Bay Recreation Centre. The Centre will accommodate most if not all departments from the administration building, (depending on circumstance) however, the existing infrastructure is insufficient to support all staff and business functions, therefore additional power outlets, data outlets and voice outlets will be required in the event of business relocation (refer to recommendations for full details).

SUPPLIES AND EQUIPMENT

An emergency supply of stationery should be secured at the Sports and Recreation Centre to provide for immediate use following a disaster. This supply should include:

- 100 council letterheads
- 100 envelopes
- 15 A4 writing pads
- 20 pens
- 20 pencils
- Hard copy purchase order and receipt books
- 2 copies of each form used by council

Fax machines, photocopiers, furniture and additional office equipment will also be required for the relocation of staff and business functions. Contact numbers for each supplier can be found under the General Contacts section.

CRISIS MANAGEMENT TEAM RESPONSIBILITIES

Title	Responsibilities		
	Primary media spokesperson		
	Community contact/spokesperson		
CEO	 Disaster declaration Monitor the overall situation Liaise with government and regulatory bodies Liaise with key parties Assist in decision making Assist in negotiations Keep track of high level recovery progress Assist in negotiations of insurance and legal issues Brief all department managers of the situation This excludes the following: Making decisions in the recovery team meetings (Executive Manager Finance & Administration) 		
	- Processing insurance claims (as above)		
	- Preparing a staff briefing (department managers)		
Executive Manager Finance and Administration	 Brief the CEO on disaster declaration Assist with notification of disaster declaration Activate the crisis team Monitor recovery progress Chair crisis team meetings Delegate tasks to team members 		
Executive Manager Finance & Administration/ Executive Manager CD & Tourism	 Organise the setting up of the crisis centre. Arrange for the following items to be available within 24 hours and delivered to the crisis centre, including: Telephones Fax Computers Furniture Stationery Refreshments Ensure that the crisis centre set-up is completed. Gather accurate information regarding the situation Read media releases and answer questions from the media. 		

	Inform and update the Executive Manager Finance & Administration and CEO with any new information, setbacks encountered and/or progress made.			
	Receive all incoming calls and divert them to the respective departments.			
	Handle low-level inquiries regarding the situation			
	Attend to staff incidents			
Administration &	Address work cover issues			
Finance staff	 Oversee staff welfare and health issues, specifically with counselling staff after an emergency. 			
	Attend to insurance related issues.			
	Organise for a comprehensive damage assessment to be conducted			
Francis	Configure all servers			
Executive Manager	Update servers with the latest backup data			
Finance & Administration	Ensure that all PCs are set-up and operating			
	Set-up and monitor the IT network			
	Inform all deopt staff of the situation at hand.			
Works Manager	Ensure that all engineering critical processes are restored			
	Assess work required for structural recovery

MANUAL BOOKKEEPING

A list of Shire equipment is held in the Synergy asset system; The IT department will need to extract that data from backup at the earliest possible time after the disaster.

TESTING THE PLAN

As the Shire grows and changes overtime, it is essential to ensure that the current procedures of before, during and after a disaster remain relevant and effective.

The IT Department should conduct a structured walkthrough every 12 months, which will involve a review of the BC/DR plan, with the CEO.

Every 24 months a physical test should be performed, testing the external sites and resources that are relied upon in the case of a disaster. The occurrence of particular events also requires a test or review of the BC/DR plan to be carried out:

- Changes made to the emergency procedures.
- A new business operation is introduced.
- Changes made to the Shires' organisational structure.
- A disaster situation is managed and business processes restored.

Performing regular tests will examine and ensure the Shire of responding to and managing an emergency situation.

RECOMMENDATIONS

CRISIS CENTRE PREPARATION

The Shark Bay Recreation Centre

In the event of relocation, current infrastructure at the Shark Bay Recreation Centre will be sufficient to support the allocated staff and business operations. There will be a reliance on mobile phones as the method of communications and there will be limited PC's for use by staff. The Crisis Management Team should visit the Shark Bay Recreation Centre to define which resources should be allocated to whom. This will ensure that confusion will be reduced because staff will know the resources allocated to them. The same applies to the secondary crisis Centre's the Town Hall and the Shark Bay World Heritage Discovery and Visitors Centre.

SHIRE ADMINISTRATION BUILDING SECURITY

Options to install a fire alarm system as well as an in-house fire sprinkler system should be considered. This will greatly reduce the risk and impact associated with a fire. The installation of a CO2 system in the server room should be investigated as a method of protection that won't cause irreparable damage to the equipment.

SECURITY OF CRITICAL RECORDS

The Shire administration building holds all critical records that are currently under threat of a potential disaster. These vital records include: Rate books, Minute/Agenda books, Legal agreements, Contracts, Mortgages, Title deeds, Cemetery records, Employee files and Electronic backup hard drives. This building has external windows and

limited to no fire protection. Suitable means of storage and protection should be investigated to protect these records. The Works Depot (situated on higher ground) should be investigated as a secondary storage site for these records (sea container and safe are fire proof and higher ground means less chance of flooding.)

EXECUTIVE SUMMARY

The Business Continuity/Disaster Recovery (BC/DR) report is aimed at ensuring the continuity of business operations, with minimal disruption, in the event of a disaster. Without such a plan, an organisation would have no path to follow amidst the confusion that often follows a disaster.

Before a disaster it is imperative that the Shire of Shark Bay is well prepared for such an event, whether it would be as devastating as a flooding or as minimal as a blackout. Preventative measures should be implemented, such as the installation of fire protection in the administration building in particular the server room as well as upgrades to the security surrounding the current server room, which will greatly reduce the Shires' exposure to threats such as flood, fire, theft and vandalism.

As with all prevention disaster plans, the Shire cannot safeguard itself against every possible scenario. For this reason emergency procedures for a disaster situation have been developed to serve as a guideline for Shire staff, amidst the disorder that is usually experienced after a disaster.

Following a disaster the Shire must be prepared to focus on re- establishing all critical business operations as soon as possible. In the event of a high impact disaster, such as a flooding, the relocation of Shire operations may be necessary. For this purpose, three sites have been identified as possible crisis Centre's, the Shark Bay Recreation Centre, the Town Hall and the Shark Bay World Heritage Discovery and Visitors Centre. Correspondingly, a Crisis Management Team should be established to organise and control all activities involved in the restoration of Shire operations and disaster management. The section on the Crisis Management Team details the responsibilities and contacts of each member for all business disaster emergencies.

Overall, this plan will provide a structured approach to business continuity/disaster recovery planning. Through the provision of preventive Measures / recovery procedures, the impact of any potential disaster is significantly reduced.

APPENDIX A

PLAN FOR RELOCATION

Primary Crisis Centre

The Shark bay Recreation Centre has been allocated as the primary crisis Centre in the event of a disaster. The Recreation Centre will host approximately 12 staff members (10 permanent.) The Shark Bay World Heritage Discovery and Visitors Centre may be used as the primary Centre of customer service operations (depending on the nature of the disaster.)

Secondary Crisis Centre's

The Town Hall and Shark Bay World Heritage Discovery and Visitors Centre have been assigned as secondary crisis Centre's and may function as primary Centre's depending on circumstance.
