I have been resident in Denham for nearly two years. Although I grew up in a country town in the south west I have embraced the return to a small town environment after many years in the city. Professionally I have worked in both the medical and agricultural fields and ended up managing the national lupin breeding program in the Dept. of Agriculture. I have spent many years as a research scientist. I have been on many committees through my sporting activities as well as at a professional level on State, National and International committees where seeking the balance between several interests was a challenge. I have lived overseas and travelled extensively throughout the world both as a tourist and as part of my professional commitments. I still do voluntary research at the WA Herbarium and Museum. Locally I am a member of the Arts Council Committee.
